CONTENTS

Special Issue: Valence and the Chemical Bond—A tribute to celebrate the life and work of Charles Coulson (1910–1974) on the 40th anniversary of the publication of his seminal book "Valence", Oxford University Press, 1952. Part I

PART I, Volume 259

Foreword xiii

Dedication xv

Some key historical highlights in the evolution of the modern concept of valence
D.H. Rouvray (Athens, GA, USA) 1

The chemical bond and molecular structure
B.T. Sutcliffe (York, UK) 29

Eccentric orbitals for lone pairs and hybridization theory: the case of NH_3
C. Barbier (Villeurbanne, France), G. Berthier, D. Piazzola (Paris, France) and G. Del Re (Naples, Italy) 59

Gel'fand structures: primitive patterns of understanding
F.A. Matsen (Austin, TX, USA) 65

On the shape and structure of molecules
A. Riera (Madrid, Spain) 83

Electronegativity and the concept of charge capacity
P. Politzer (New Orleans, LA, USA), J.E. Huheey (College Park, MD, USA), J.S. Murray (New Orleans, LA, USA) and M. Grodzicki (Hamburg, Germany) ... 99

A universal density criterion for correlating the radii and other properties of atoms and ions
B.M. Deb, R. Singh and N. Sukumar (Chandigarh, India) 121

Chemical bonds and momentum anisotropy in phase space
J.E. Harriman (Madison, WI, USA) 141

Increased-valence structures and spin-coupled valence bond descriptions of 1,3-dipolar molecules
R.D. Harcourt (Parkville, Vic., Australia) 155

Ab initio heats of formation of medium-sized hydrocarbons. Part 14. Pyracylene and biphenylene
J.M. Schulman and R.L. Disch (Flushing, NY, USA) 173

Ab initio studies on heterocyclic conjugated polymers: structure and vibrational spectra of thiophene, oligothiophenes and polythiophene
M. Kofranek, T. Kovář, H. Lischka and A. Karpfen (Vienna, Austria) 181

Tetramethylammonium as proton donor in hydrogen bonding: an ab initio and infrared study
J. Koller, J. Grdadolnik and D. Hadži (Ljubljana, Slovenia) 199

Ab initio MO study of the potential energy surface of the $HF \cdots Cl_2$ binary complex
D.A. Barker, A. Hinchliffe (Manchester, UK) and W.B. De Almeida (Belo Horizonte, Brazil) 211

Ab initio study of stability and structure related to geometric isomerism of imines and O-protonated carbonyl compounds. Part I. Simple acyclic compounds
T.-K. Ha and H.H. Gunthard (Zurich, Switzerland) 229

Hydride affinities of halogen substituted carbocations: the $C_2H_4X^+$ (X = F, Cl or Br) cations
C.H. Reynolds (Spring House, PA, USA) 257

Theoretical study of carbamic acid [1*H*-imidazol-2-yl-]methyl ester
G. La Manna (Palmero, Italy), M.C. Ramusino and M. Cignitti (Rome, Italy)..... 265
Ab initio study of C–H bond breaking in olefins. Part I. General valence bond and multi-configurationalself-consistent field computations on $C_2H_4 \rightarrow H_2C{=}\dot{C}H + H$
G.R. De Maré (Brussels, Belgium) and E.M. Evleth (Paris, France)..... 273
Empirical corrections of SCF geometries with special examples from 4-21G calculations
J. De Smedt, F. Vanhouteghem, C. van Alsenoy, H.J. Geise (Wilrijk, Belgium) and L. Schäfer (Fayetteville, AR, USA)..... 289
Generalized Hückel–Möbius rule
D.J. Klein and A.T. Balaban (Galveston, TX, USA)..... 307
Quantum-chemical study of the Fukui function as a reactivity index. Part 3. Nucleophilic addition to α,β-unsaturated compounds
W. Langenaeker, K. Demel and P. Geerlings (Brussels, Belgium)..... 317
Conformations and rotational barriers of aromatic polyesters. Part II. Rotational barriers in parahydroxybenzoic acid, polyethylene terephthalate, and small aromatic moieties
B. Coussens, K. Pierloot (Leuven-Heverlee, Belgium) and R.J. Meier (Geleen, The Netherlands)..... 331
Theoretical study of bonding in $SePH_3$, OPX_3 and SPX_3: an ab initio investigation (X = H, F, Cl, $-C{\equiv}CH$, $-CH_3$, $-NH_2$, $-C{\equiv}N$)
C. Yang, E. Goldstein, S. Breffle and S. Jin (Pomona, CA, USA)..... 345
Determination of bond energy terms in silicon-containing compounds
G. Leroy, M. Sana, C. Wilante and D.R. Temsamani (Louvain-la-Neuve, Belgium)..... 369
The spin-coupled description of lithium clusters. Part I. Optimal geometrical arrangements and body-centred-cubic fragments
E. Tornaghi (Milan, Italy), D.L. Cooper (Liverpool, UK), J. Gerratt (Bristol, UK), M. Raimondi and M. Sironi (Milan, Italy)..... 383
Boron versus carbon: conjugation, hyperconjugation and rotational barriers in the "neoclassical" boron hydride, triborylborane [$B(BH_2)_3$] and its dianion
A. Skancke (Tromso, Norway) and J.F. Liebman (Baltimore, MD, USA)..... 411

Author Index Volumes 259–261..... 431

Subject Index Volumes 259–261..... 433

PART II, Volume 260

Foreword..... xiii

Pseudopotential periodic Hartree–Fock study of the cristobalite to stishovite phase transition
B. Silvi, L.-H. Jolly and Ph. D'Arco (Paris, France)..... 1
Cohesive energies of simple ionic and covalent solids
R.G. Pearson (Santa Barbara, CA, USA)..... 11
Infrared and ab initio studies of molecules containing SiH bonds. Part I. A correlation between ν^{is}(SiH) and r_e(SiH)
D.C. McKean, I. Torto (Aberdeen, UK), J.E. Boggs and K. Fan (Austin, TX, USA)..... 27
A theoretical study of chemical bonds in silicon species
H. Fujimoto, T. Yabuki, K. Tamao and K. Fukui (Kyoto, Japan)..... 47
Bonding in the $(MgH)^+$ quasimolecule
J.C. Garciá-Madroñal, O. Mó (Madrid, Spain), I.L. Cooper and A.S. Dickinson (Newcastle upon Tyne, UK)..... 63

On the concept of "bond valence sums" and its applicability in solid state chemistry and physics
L. Jansen, L. Chandran (Zurich, Switzerland) and R. Block (Amsterdam, The Netherlands) 81
Correlation forces in electron scattering from atoms and molecules: a density functional approach
F.A. Gianturco (Göttingen, Germany) and J.A. Rodriguez-Ruiz (Malaga, Spain) 99
π-Electron "ring-currents" in dipleiadiene
B.R.M. de Castro, J.A.N.F. Gomes (Porto, Portugal) and R.B. Mallion (Canterbury, UK) 123
Calculated "London" π-electron magnetic properties of some "perturbed" annulenes: their dictations and dianions
B.R.M. de Castro, J.A.N.F. Gomes (Porto, Portugal) and R.B. Mallion (Canterbury, UK) 133
Variational methods and the electronic continuum
A. Macías (Madrid, Spain) 143
Molecular mechanics calculations (MM3) on conjugated ketones
N.L. Allinger, S. Rodriguez and K. Chen (Athens, GA, USA) 161
An accurate fit of the potential energy surface of the BeHF system
A. Aguado, C. Sieiro and M. Paniagua (Madrid, Spain) 179
Quantum chemistry in the condensed phase: an extended direct reaction field approach
P.Th. van Duijnen, A.H. Juffer and H.P. Dijkman (Grongingen, The Netherlands) 195
Recent progress on representations for Coulomb integrals of exponential-type orbitals
E.O. Steinborn, H.H.H. Homeier and E.J. Weniger (Regensburg, Germany) 207
The multiconfigurational theory of adiabatic outer-sphere electron transfer reactions proceeding in polar solvents
M.V. Basilevsky and G.E. Chudinov (Moscow, Russia) 223
Strong Mills–Nixon effect in benzocyclobutadienes
Z.B. Maksić, M. Eckert-Maksić, D. Kovaček and D. Margetić (Zagreb, Croatia). 241
Hybrid orbitals evolution and reaction path in addition reactions
F. Zuccarello (Catania, Italy) and G. Del Re (Naples, Italy) 249
Analysis of the hydride transfer in the $[CH_3–H–CH_2]^+$ system in terms of valence bond structures
J. Mestres, A. Lledós, M. Duran and J. Bertrán (Bellaterra, Spain) 259
Electron density in the ground states of atoms and molecules
N.H. March (Oxford, UK) 273
Singlet and triplet states of an electron pair in a molecule—a simple model
J. Michl (Boulder, CO, USA) 299
"Slide-rule" basis sets: application to the ^3S state of helium-like species
G. Doggett and G.D. Fletcher (York, UK) 313
The general harmonic force field of methyl fluoride
M.M. Law, J.L. Duncan (Aberdeen, UK) and I.M. Mills (Reading, UK) 323
The meta photocycloaddition of benzene to ethylene: ab initio calculation of a symmetric pathway
A.M. Stehouwer, J.A. van der Hart, J.J.C. Mulder and J. Cornelisse (Leiden, The Netherlands) 333
Valence in chemisorption studies
M. Seel (Houghton, MI, USA) 339
Ab initio studies of methylated 1,3-butadienes
H. Guo and M. Karplus (Cambridge, MA, USA) 347

A comparative study of isoelectronic and isogyric reactions. Part 2. Molecular orbital calculations of diatomic sulfides, oxides and halides
C.A. Deakyne, K.K. Brown, C.S. Pacini, D.C. Pohlman (Charleston, IL, USA), D.N. Gray (New Orleans, LA, USA) and J.F. Liebman (Baltimore, MD, USA)... 395
The molecular structure of pentastanna[1.1.1]propellane and bicyclo[1.1.1]-pentastannane from the quasi-relativistic SIC-MS-Xα theory
N. Gallego-Planas and M.A. Whitehead (Montréal, Que., Canada)..... 419

Author Index Volumes 259–261..... 433

Subject Index Volumes 259–261..... 435

PART III Volume 261

Foreword..... xiii

The definition of a chemical bond, of molecular structure and of its change as exemplified by the structure diagram for $C_4H_7^+$
R.F.W. Bader (Hamilton, Ont., Canada) and K.E. Laidig (Cambridge, UK)..... 1
Oxidation state and the chemical bond in metal-organic complexes
I. Fischer-Hjalmars, A. Henriksson-Enflo and H. Holmgren (Stockholm, Sweden)..... 21
Ab initio calculations of nonadditive effects
M.M. Szczęśniak (Rochester, MI, USA) and G. Chałasińksi (Carbondale, IL, USA)..... 37
Molecular wavefunctions from chemical bonds: the fragment self-consistent field theory
G. Náray-Szabó (Budapest, Hungary) and G.G. Ferenczy (Vandouvre-lés-Nancy, France)..... 55
A valence bond study of the dipole moment of CO
A. Burritt, R.G.A.R. MacLagan and M.R. Morrison (Christchurch, New Zealand)..... 63
Magnetic interactions and 4-currents
J. Avery and F. Antonsen (Copenhagen, Denmark)..... 69
Correlation in the photoionization process: the relaxed Hartree–Fock method
F.P. Larkins and G.B. Armen (Parkville, Vic., Australia)..... 79
The Extended-Hückel perturbation theory and the concept of orbital balance
R.F. Hudson (Canterbury, UK)..... 91
About the nature of the chemical bond
R. Daudel (Paris, France)..... 113
Reactivity of tetramethylene biradicals. Through-bond and through-space interactions: two singlet electronic states of a biradical
C.J. Samuel (Coventry, UK)..... 115
Chemical bonding and vibrations
J.-L. Calais (Uppsala, Sweden)..... 121
Ab initio calculation of the structural parameters, conformational stability, vibrational frequencies and Raman and infrared intensities of methoxydimethylphosphine
J.R. Durig and F.F.D. Daeyaert (Columbia, SC, USA)..... 133
Analysis of avoided crossings in energy correlation diagrams of Jahn–Teller systems
R. Lefebvre and O. Atabek (Orsay, France)..... 153

Stability patterns in borane cluster chemistry rationalised by extended Hückel molecular orbital studies
W.R. Gill, M.E. Jones, K. Wade (Durham, UK), W.W. Porterfield (Hampden-Sydney, VA, USA) and E.H. Wong (Durham, NH, USA) 161
Fine structure splittings of potassium-like and rubidium-like ions by the multiconfiguration Dirac–Fock method
M.A. Ali (Washington, DC, USA) 175
Insights into the molecular structure and chemical bonding of regular oligomers and polymers from their XPS valence spectra
J. Delhalle and M. Deleuze (Namur, Belgium) 187
Pair states and orbital exchange coupling parameters of the dimeric diol complexes $[Cr(ox)_2(OH)]_2^{4-}$ and $[Cr(gly)_2(OH)]_2$
T. Schönherr (Dusseldorf, Germany) 203
Understanding van der Waals bonding
V. Magnasco, G. Figari and C. Costa (Genova, Italy) 237
Propagator descriptions of ionisation and excitation phenomena using valence bond reference functions
B.T. Pickup and D.H. Mosley (Sheffield, UK) 255
The diatomic bond in a monochromatic laser field: a time dependent study
J. Broeckhove, B. Feyen and P. Van Leuven (Antwerp, Belgium) 265
A density functional study of the aluminium dimer
E.S. Fois, A. Gamba and M. Sironi (Milan, Italy) 277
On the diagrammatic analysis of electron correlation effects in atoms and molecules
S. Wilson (Chilton, UK) 287
Electronegativity: why has it been so difficult to define?
L.C. Allen and E.T. Knight (Princeton, NJ, USA) 313
Dynamically produced degeneracies
C. Wulfman (Stockton, CA, USA) 331
On kinetic energy densities
J.P. Dahl and B. Amstrup (Lyngby, Denmark) 345
Solid state effects in the molecular crystals of Cl_2, Br_2 and I_2
P. Blaha and K. Schwarz (Vienna, Austria) 355
An ab initio model for methyl torsional potentials incorporating skeletal flexing
L. Goodman (New Brunswick, NJ, USA) and A.G. Ozkabak (San Leandro, CA, USA) 367
Helides of carbon and silicon: an ab initio study of their geometric and electronic structures
E.D. Jemmis, M.W. Wong, H.B. Bürgi and L. Radom (Canberra, A.C.T., Australia) 385
The electron affinity of H_2: a valence bond study
R. McWeeny (Pisa, Italy) 403

Author Index Volumes 259–261 415

Subject Index Volumes 259–261 417
